Use of the U.S. Census Bureau's Public Use Microdata Sample (PUMS) by State Departments of Transportation and Metropolitan Planning Organizations

TRB's National Cooperative Highway Research Program (NCHRP) Synthesis 434 Sample (PUMS) by State Departments of Transportation and Metropolitan Planning Organizations. The report is designed to serve as a reference for transportation planners who manage the confidential records of specific individuals and housing units from whom Decennial Census data have been obtained.

The report is designed to serve as a reference for transportation planners who manage the confidential records of specific individuals and housing units from whom Decennial Census data have been obtained.

The U.S. Census Bureau also draws a sample from the full set of microdata and releases the products, so that users can develop their own tabulations.

These data are being used by state departments of transportation and metropolitan planning organizations to analyze the commuting characteristics of population subgroups, and for supporting travel demand management programs.
